NEAPCO DESIGNS AND MANUFACTURES QUALITY PRODUCTS THAT ARE BEST SUITED FOR YOUR APPLICATIONS

Neapco's products for the Automotive and Light Truck market focus on passenger vehicles and trucks up to class 2 in size. The Automotive and Light Truck components utilize a range of Neapco universal joints from N1000 up to 1410 series. Neapco offers a complete line of greaseable universal joints and permanently lubricated universal joints in specific series. Some common applications in this market include:

- Electric Vehicles for City or Neighborhood Use
- Hybrid and Alternative Fuel Vehicles
- Light Duty Trucks
- Sport Utility Vehicles
- Automoblies

Neapco offers many styles of yokes to interface with different transaxle or transmission output shafts. Standard products includes spline, flanged and half-round end yokes.

Neapco can provide fixed length drives or incorporate telescoping capability using spline shafting, slip yoke/stub shaft assemblies or CV joint assemblies. Types of Constant Velocity joints offered include fixed (Rzeppa), plunging (Double Offset, Tripod joints) and Double Cardan CV head assemblies.

INNOVATIVE DRIVELINE SOLUTIONS
