NEAPCO DESIGNS AND MANUFACTURES QUALITY PRODUCTS THAT ARE BEST SUITED FOR YOUR APPLICATIONS

**N**eapco's products for the Off Highway and Heavy Truck markets focus on off highway vehicle and trucks over class 2 in size. The Off Highway and Heavy Truck applications' components utilize a range of Neapco universal joints from 1350 up to 1810 series. Neapco offers a complete line of greaseable universal joints and permanently lubricated universal joints in specific series. Some common applications in this market include:

- Crawler types of Equipment
- Dozers
- Tractors
- Forklifts
- Trucks
- Backhoe Loaders
- Log Skidders
- Feller Bunchers
- Drills, Motor Graders
- Trenchers and Ditchers
- Cranes
- Wheel Loaders
- Large Trucks

Neapco offers many styles of yokes to interface with different end connection configurations. Standard products include half round, spline and flanged yokes. Neapco can provide fixed-length or incorporate telescoping capability using slip yoke and stub shaft or yoke shaft slip yoke combinations.
